**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-30 drawn to a coupling for preventing transfer of vibrations between chambers, classified in class 73, subclass 663.

II. Claims 31-32 drawn to metrology system for inspecting wafers, classified in class 250, subclass 441.110.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects ( MPEP 806.04, MPEP 808.01 ). In the instant case the inventions are distinct, each from the other because of the following reasons:

With respect to Invention I, the coupling device is placed between first and second chambers for preventing transfer of vibrations between chambers and for sealing a passage between the first and second chambers.

With respect to invention II, the metrology system for inspecting wafers comprising a floating inspection chamber under vacuum, a fixed transfer chamber, a gate valve arranged between the chambers, and a coupling to prevent vibrations transfer.
